② OREM (1985) "Nursing is deliberate action to bring about humanly desirable conditions in persons and the environment."

③ V-H (1961) "The unique function of nurses is to assist the individual, young or old, in the performance of those activities contributing to health or its recovery (or prevention of disease) that he would perform unaided if he had the necessary strength, skill, knowledge, or confidence in such a way to help him to regain in dependence on persons."
